

# HOW TO ADD AN OPEN LICENCE

NATIONAL FORUM  
FOR THE ENHANCEMENT OF TEACHING  
AND LEARNING IN HIGHER EDUCATION

Once you have selected a Creative Commons licence for your resource, the **creation of the licence itself is straightforward.**

Simply go to the **Creative Commons website:**

<https://creativecommons.org>

and click 'Share your work'.

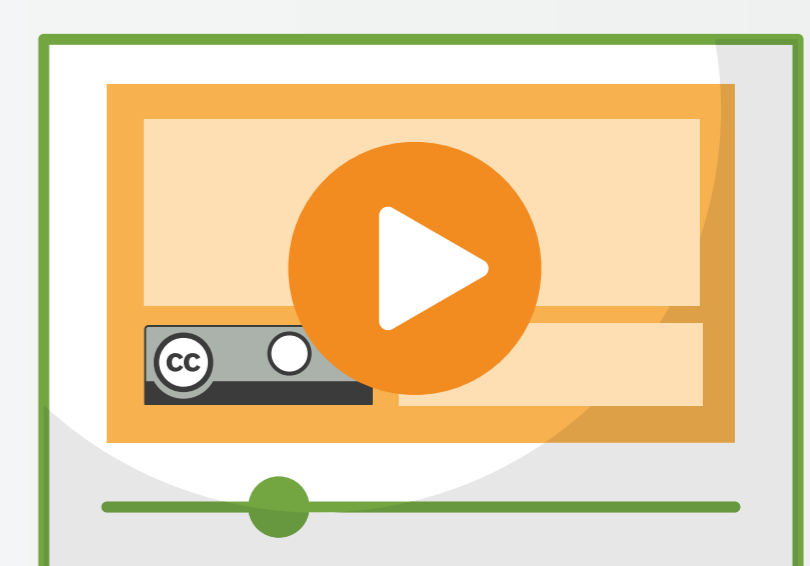

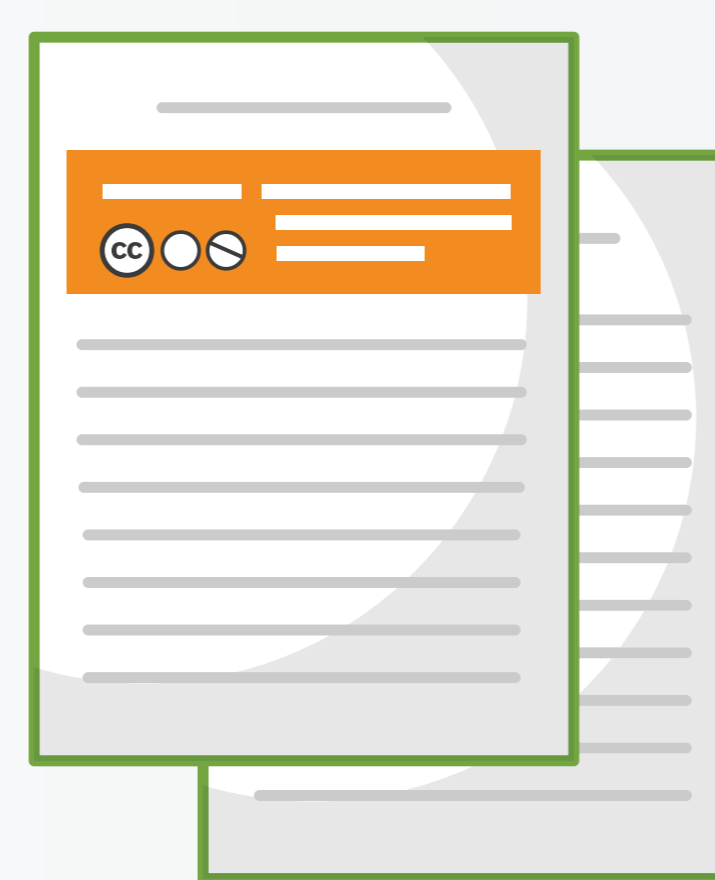

You will be brought through the **simple steps of choosing a licence**, which you can then cut and paste onto your resource.

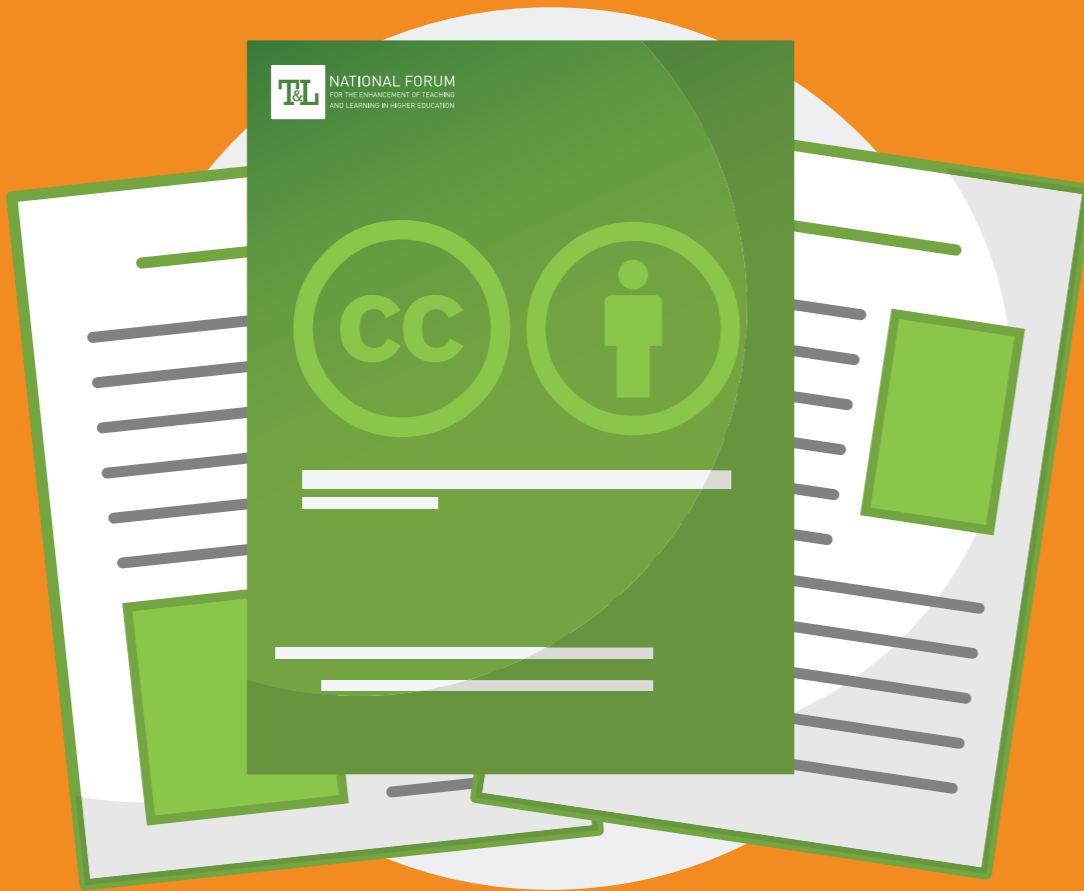

All CC licences contain the Attribution or 'BY' element. This means that all who reuse the resource must provide attribution to the creator.

**Attribution (including CC licence information) is typically displayed:**

- in the caption of an image
- the footer of a web page
- at the beginning or end of a document
- at the beginning or end of a video, and/or in the associated metadata

You can find further guidance for adding an open licence and attributing correctly in the following resources:

National Forum guide - *'National Forum Open Licensing Toolkit'*

National Forum OER/OEP online resource - *OER attribution page*
