GUI for CSS
Ffrendi

OER Info

The Ffrendi is an online, browser-based tool that makes it easier to learn and generate CSS visually. The name comes from the idea to provide a friendly frontend for learning and applying CSS.

Key Features

— Visual Object Creation

Add text, shapes, and other elements directly onto the canvas.

— **Live Styling Controls**

- Fonts and typesetting (choose font families, adjust size, spacing, alignment).
- Filters like transparency, blur, &blend modes.
- Tools for size, rotation, X/Y coordinates.

— **See the Code**

See the code generate as you code.

● Who is it for?

Students & beginners learning CSS who want a more intuitive entry point.

Educators who want to demonstrate CSS properties in real time.
